Plans for Future Programs

Starting with this month's program on community, we are lifting up a larger theme of ***interdependence***. In recognition of the vital roles that more than human lives on Earth play in our health and well-being, we'll be spotlighting:

- July 27th: Pathways to Reciprocity - Part 1: **The Intelligence of Fungi**
- August 31st: Pathways to Reciprocity - Part 2: **The Intelligence of Plants**
- September 28th: **Generating & holding a 250-year Vision of *Interdependence***. Together with an opportunity to integrate the programs from June through August:

For programs in July and August we'll watch and reflect together on several very engaging videos. We'll also offer separate dates before each of these programs to view and discuss longer topic-related videos (such as [Fantastic Fungi](#) and [New Science of Plants](#)). With Betty Kissilove's guidance in September we'll imagine getting to and enabling a 250-year vision of interdependence.
